1. Introduction & Module Overview

The EXTRAs module is a collection of integration tools — connecting the hotel to external systems: - Channel Manager: OTA bookings (MakeMyTrip, Booking.com etc.) and rate/inventory sync - WhatsApp: automatic guest messages (booking confirmation, check-in/out, offers) - Smart Card: card-based payments (with the Members module) - E-Invoice: GST e-invoice generation (IRN) for B2B bills This module is mostly used by admin/IT — set up once, then it runs automatically.

Module Sections Overview

Section	Purpose	Key Screens
Channel Manager	OTA sync	Update Rates, Run Derived Pricing, Channel Enviro, Data Push
WhatsApp	Guest messaging	WhatsApp Enviro, Templates
Smart Card	Card system	Card Initialization, Registration, Recharge, Refund
EInvoice	GST e-invoicing	EInvoice Parameter, EInvoice Report

2. Channel Manager

2.1 Update Rates & Derived Pricing

Navigation Path: EXTRAs ►Channel Manager ►Update Rates / Run Derived Pricing

2.1 Update Rates & Derived Pricing

Update room rates in HMS and push rates on OTAs from derived pricing rules (e.g. HMS rate +15% = OTA rate). Run Derived Pricing syncs rates on all channels.

Screen	Function
Update Rates	Room type wise rates can be set (date range wise)
Run Derived Pricing	Push after applying channel-specific markup/discount rules
Channel Enviro	OTA credentials — which channel, API keys, mapping
Data Push	Push rates/availability/inventory manually

2.2 OTA Booking Flow

1. Guest books on an OTA
2. Channel manager pulls/drops booking in HMS.
3. Booking is visible in the Reservation List (source = OTA)
4. Advance/amount reconciliation against the monthly statement
5. Check-in happens only through the normal Front Office

3. WhatsApp Integration

3.1 WhatsApp Enviro & Templates

Navigation Path: EXTRAs ►What's App ►WhatsApp Enviro / Templates

3.1 WhatsApp Enviro & Templates

WhatsApp API provider credentials setup and message templates. Templates: booking confirmation, check-in instructions, welcome, checkout bill, feedback link, offers. Dynamic variables (guest name, room no., dates) are hosted in the template.

Setup	Description
WhatsApp Enviro	API URL, key, sender number, balance status
Templates	Event-based messages — set trigger points
Triggers	Booking created / Day before arrival / On check-in / On checkout / Payment received

3.2 How Auto-Messages Work

- Get the template approved (WhatsApp policy) — set up in the system
- Trigger event has occurred in the hotel (e.g. guest check-in)
- The system has sent a template message to the guest number.
- Delivery report/balance is visible in the dashboard
- Balance is low to recharge (dashboard warning shows)

4. Smart Card

4.1 Card Lifecycle Screens

Navigation Path: EXTRAs ► Smart Card

Valid Up To: dd/-/yyyy

Blocked: Select

Address: Enter Full Address

Recarge Amount:

Submit

Card Refund — last step of card lifecycle

Card-based payment system with the Members module — initialize blank cards, issue to members (registration), recharge, refund on cancellation. Detailed training is in the Members Management manual — this is the admin setup side.

Screen	Purpose
Card Initialization	Register blank cards in the system
Card Registration	Link to card member
Card Recharge	Balance load – along with payment
Card Refund	Membership surrender — balance wapap

5. E-Invoice (GST)

5.1 Elnvoice Parameter

2026-27

E-Invoice Parameters

API ID: f7KWT4e0-IQub-bpI2-G1Y-uUGDebdP

API Secret: f7KWT4e0IQubbpI2

E-Invoice Username: speaktosatishmh

E-Invoice Password:

Customer ID: C30026

Active Status: Yes

Save Parameters Cancel

5.1 Invoice Parameter

GST portal/API credentials — company GSTIN, e-invoice API keys, applicable document types (B2B invoices only), auto-generate threshold (mandatory for those with Rs 5 crore turnover).

Field	Description
GSTIN + Place	Seller details
API Credentials	NIC/einvoice API access
Applicability	Which bills will get an e-invoice
Auto/Manual	Bill save pe auto IRN ya manual trigger

5.2 EInvoice Flow & Report

Navigation Path: EXTRAs ►EInvoice ►EInvoice Report

The screenshot displays the 'E-Invoice Report' interface. At the top, there's a header with 'Analysis Demonstration Package (103)' and '2026-27'. Below this, filters for 'From Date' (01/Sep/2026), 'To Date' (18/Sep/2026), and 'Upload Status' (Uploaded) are visible, along with a 'Search Q' button. The main content area is divided into three sections: 'Front Office', 'Banquet', and 'POS'. Each section has a table with columns: Bill No, Bill Date, Company Name, GST No, Doc ID, Upload Date, Doc Detail, and IRN No. All three tables currently display 'No Data Available'.

5.2 EInvoice Flow & Report

When a B2B bill is settled, an e-invoice is generated — you get an IRN (Invoice Reference Number) + QR code which prints on the bill. The EInvoice Report keeps a record of all generated e-invoices + a cancellation option.

11. Settle your B2B guest/company bill.
12. E-invoice auto-generate — IRN + QR is sent on bill
13. If wrong, cancel from the EInvoice Report (24-hour window)
14. Monthly — these invoices auto-match in GSTR-1

6. Complete Screens Gallery — EXTRAs (All Captured Screens)

This gallery shows SAARI captured screens of the EXTRAs module which are not covered in detail in the main sections. For revision after training — Every screen the trainee has seen before, there is a place for complete reference.

7. Appendix

Admin Setup Checklist (One-time)

Order	Task	Screen
1	Credentials + room mapping of OTA channels	Channel Enviro
2	Set derived pricing rules	Run Derived Pricing
3	WhatsApp provider + templates approve	WhatsApp Enviro / Templates

Order	Task	Screen
4	Card system activated (if club is there)	Card Initialization
5	E-invoice API credentials + thresholds	EInvoice Parameter

Common Scenarios (Training Q&A)

Scenario	what to do
Rate not synced on OTA	Data Push manually chalaao; Channel Enviro credentials verify
OTA booking did not come in HMS	Check booking status in Channel manager portal; Data Push/logs check
WhatsApp balance drain	Recharge when the dashboard warns — from the provider portal
Template rejected	Revise by following WhatsApp policy — variable format check
E-invoice failed	See the error in EInvoice Report — fix GSTIN/pan validation and retry.
Card reader not working	View card status in Card Initialization; hardware service ticket

Troubleshooting

Issue	Cause	Solution
Rates push fail	API/network issue	Connection test in Channel Environment; retry data push
Duplicate OTA booking	From both pull + manual	Cancel the manual one, keep the source OTA
WhatsApp messages are not going through	Balance low / template unapproved	Balance recharge + template status check
IRN has not been generated	GSTIN invalid/blocked	Verify GSTIN in Party Master
E-invoice is not being canceled	24hr window cross	Credit note process (via accountant)
