1. Introduction & System Overview

Analysis HMS (Hotel Management System) is a comprehensive cloud-based software designed for the Indian hospitality industry. It manages Front Office, Housekeeping, Laundry, POS, Inventory and Reporting on a unified platform — from any device, through a web browser. The Housekeeping Module provides complete management of room cleaning, staff assignment, room status tracking and laundry services. The module is organized into four main sections: MASTER (setup), OPERATIONS (daily workflow), TRANSACTIONS/LAUNDRY (billing & settlement), REPORTS (analytics).

Module Sections Overview

Module Section	Purpose	Key Functions
MASTER	Setup & Configuration	Floor, Housekeeper, Cleaning Type, Supervisor, Checklist, Amenities
OPERATIONS	Daily Workflow Management	HK Screen, Room Status Board, Assignments, Cleaning, Inspection, Lost & Found
TRANSACTIONS (Laundry)	Laundry Billing & Settlement	Laundry Memo, Bill Reprint, Settlement Entry, Split Bill
REPORTS	Analytics & Reporting	HK Report, Cleaning Register, Assignment & Amenities Reports
LINEN (Extras)	Linen Movement Tracking	Laundry Send, Laundry Receive

Key Benefits

- Real-time room status tracking across all floors
- Automated room assignment to housekeeping staff
- Digital cleaning checklists for consistent quality
- Laundry billing and settlement management
- Housekeeper workload monitoring & efficiency tracking
- Photo documentation before/after cleaning
- Lost & Found and Damage management
- Integrated inspection workflow with approval/rejection

3. Master Module — Setup & Configuration

The Master module contains several setup entries that must be made once before operations — floors, staff, cleaning types, supervisors, checklists and amenities.

3.1 Floor Master

Navigation Path: Main Setup ► House Keeping ► Floor Master

The screenshot displays the 'Floor Master' configuration page. At the top, there's a header with the application name and date. Below it, a form allows adding a new floor with 'Name' and 'Supervisor' fields. A 'Submit' button is present. Underneath, a table lists existing floors. The table has columns for 'Sno.', 'Name', 'Supervisor', and 'Action'. The 'Action' column contains 'Edit' (green) and 'Delete' (red) buttons for each floor entry. The floors listed are 1ST FLOOR through 13TH FLOOR, BASEMENT, APARTMENT, VILLA, and GROUND FLOOR. A search bar is located on the right side of the table.

3.1 Floor Master

Define the floors of the property. Rooms and housekeepers are assigned according to each floor.

Element	Description	Action
Floor Name	Floor name (1ST FLOOR, GROUND FLOOR...)	Enter
Submit	Saves records	Click
Search Box	Filters existing floors	type with
Edit / Delete	Record modify/remove	by clicking on the row

Split Bill — demo property pe permission restricted (live screen)

Splitting one laundry bill across multiple accounts: select the original bill → define the split amounts → generate individual bills → settle each split. The splits stay linked to the original memo. Note: This screen is restricted on the demo property — it is fully functional on a live property.

- Select the original bill
- Split amounts by defining per account
- Individual bills are generated
- Every split has a different settlement.
